

Dear Family and Friends,

Our Indoor Visitation Center is now open! After a few weeks of renovation and furniture upgrades, we conducted a very successful "soft" launch last week to make certain we got things right! We did!

We are ready to accommodate more "scheduled" visits and would ask you to call 947-4557 ext. 311 for an appointment.

This Program is "heavily regulated," even mandated, by Federal and State agencies. That said, there are a number of steps involved in allowing for a visit. We can't accommodate "drop-ins," visits may be subject to cancellation at any time, everyone is subject to a pre-health care screening, limits of two visitors per session only, social distancing is required, wearing appropriate personal protective equipment (provided) appropriately is a requirement, as well as effective hand hygiene practice.

There are other Federal and State agency rules. You'll be provided with a copy of them, as well as information on how our Program runs internally, so that each and every visit is successful.

We will continue to add additional visitation days and times during the upcoming weeks as our program, and resources, expands. Presently, we're open for visits on Tuesdays, Wednesdays and Fridays for half-hour appointments starting at 11am, 1pm and 2pm with two-seating's available.

While we're equally excited to see you rejoined with your loved one, please understand that many factors are involved in "scheduled" visits and, again, they may be cancelled at a moment's notice. So, let's communicate often and work together to make each visit a memorable one.

Should you care to donate to the expansion of our Visitation Center and Program, or to the operations of our nursing community, you can do so on our website. We can always use your support! 100% of all dollars received go right back into serving those that call Bangor Nursing their home. Many thanks!

We hope to see you soon!
